Data Center Facility Consultant

FLSA Status: Non-exempt, Full-Time Employment

Summary

Assist clients in the development of specifications, requirements and designs for data center facilities by performing the following duties.

Essential Duties and Responsibilities include the following. Other duties may be assigned.

- Synthesizes large amounts of complex data gathered from various sources, analyzes and explicates the appropriate information to the customer in the form of a formal written report.
- Develops professional written reports and effectively presents the information to top management, public groups, and/or customers during formal and informal meetings.
- Acts as second-level executive within the data center consulting service area or solely responsible for the consultation to clients in the field of data center facility physical infrastructure. This includes three phase electrical systems, uninterruptible power supplies (UPS), stationary battery installations, mechanical systems, life safety systems, physical security systems, video surveillance systems, data center space utilization and inside cable plant infrastructure.
- Displays broad level of experience with strong skills and thorough knowledge of data center design principles, with the ability to recommend system architectures based on client uptime requirements, develop estimated facility system capacities based on

inventories of enterprise hardware and be well versed in industry standards governing these systems.

- Demonstrates a familiarity with mission critical facility best practices and industry standards including those by the Uptime Institute, ASHRAE, BICSI, EIA, TIA and NFPA (NEC), and the materials utilized in both data center and SCIF construction.
- Understands networking technologies and principles, and virtualization technology, as well as be familiar with enterprise hardware including traditional servers, blade servers, switches, routers, storage devices (NAS/SAN), backup devices and other devices commonly found in the data center environment.
- Monitors and analyzes system capacity and makes recommendations for improvements as necessary.
- Ensures the resolution of customer requests and any service-level issues.
- Able to function effectively as a valued resource within a multi-disciplinary team of consultants and engineers. The Data Center Consultant must be a self-starter able to work without direct daily supervision.

Activities may also include:

- Provides technical and professional leadership in customer environments
- Works with clients to define facility system architectures, requirements and specifications
- Develops high level conceptual system architectures and facility designs
- Conducts data center physical infrastructure assessments
- Monitors existing data center facility resources (power, cooling and physical space) and extrapolate future requirements from existing system loads
- Works closely with clients, team members and partner firms; and
- Presents facility concept and project status briefings to senior client leadership

Supervisory Responsibilities

At times, the Data Center Consultant may directly supervise one or more employees and/or outside service providers in the execution of project services. Carries out supervisory responsibilities in accordance with the organization's policies and applicable laws. Responsibilities may include interviewing and training employees; planning, assigning, and directing work; appraising performance; rewarding and disciplining employees; addressing complaints and resolving problems.

Qualifications

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Education and/or Experience

Bachelor of Science degree from four-year college or university in mechanical or electrical engineering; prior data center facility experience; understanding of the basics of enterprise architecture; and, a minimum of five years' experience in the data center facility field.

Certificates, Licenses, Registrations

Data Center Facility Certifications such as those offered by the Uptime Institute, Marist College, EPI, ICOR, etc. are desirable. Hold or able to quality for a TS security clearance with ability to acquire TS/SCI.

Language Skills

Ability to read, analyze, and interpret common scientific and technical journals, financial reports, and legal documents. Ability to respond to common inquiries or complaints from customers, regulatory agencies, or members of the business community. Ability to write reports and articles for publication that conform to prescribed style and format. Ability to effectively present information to top management, public groups, and/or customers.

Mathematical Skills

Ability to calculate figures and amounts such as discounts, interest, commissions, proportions, percentages, area, circumference, and volume. Ability to apply concepts of basic algebra and geometry.

Reasoning Ability

Ability to define problems, collect data, establish facts, and draw valid conclusions. Ability to interpret an extensive variety of technical instructions in mathematical or diagram form and deal with several abstract and concrete variables.

Computer Skills

To perform this job successfully, an individual should have knowledge of MS Outlook, MS Excel, MS Project, MS Word, MS Powerpoint, Adobe Acrobat, MS Visio and SalesForce CRM.

Competencies

To perform the job successfully, an individual should demonstrate the following competencies:

<u>Analytical</u> - Synthesizes complex or diverse information; collects and researches data; uses intuition and experience to complement data; designs work flows and procedures.
